

Epicor ECN Manager

Product

- ▶ Epicor® ERP

Benefits

- ▶ Easily manage ECNs
- ▶ Process ECNs at a faster rate
- ▶ Customize to fit your company's needs

A Better Way to Process Engineering Design Changes

Epicor ECN Manager is a web-based system designed to tightly connect your engineering design changes to what you are actually building on the shop floor. It allows engineering designers to create and modify engineering change notices (ECNs) from within their design software of choice—while they are actually making the changes.

Epicor ECN Manager organizes all ECNs into a coherent and visual structure that is easy to manage, so that both engineers and engineering managers can quickly access information relevant to their workflow. It can be customized to fit your company's business requirements.

Streamline your ECN approval process with a clear visualization of your workflow and the flexibility to define the users and groups that you need.

Epicor ECN Manager has two primary capabilities: Designer and Engineering Manager.

Through the Designer functionality, you can create and manage ECNs directly through the CAD software. You can specify the users that need to review the parts for approval. You can store any relevant documentation for the ECN such as DWG™, PDF™, Excel™ and Word™ files.

With the Engineering Manager functionality, you can receive and approve changes through a highly visual user interface. Manage user type categories and assign them to users, making the approval process more efficient.

Features

Manage users

Epicor ECN Manager allows various user types and groups to fit the needs of your team. These are then used during the approval path designation. Once a user or group is defined, it can be used for dispositions.

Control the approval path

Choose who the approval path goes through. Easily drag-and-drop users, groups or both into a path tree. Once a path is constructed, it can be saved as a template for future use. This allows the ECN initiator to fully control the ECN cycle.

Quickly and easily manage ECNs

The user who is requested to approve an ECN has a highly visual user interface that allows everything to be done within Epicor ECN Manager. In addition, it integrates with Outlook allowing automatically generated notifications. These features ensure the fastest ECN process possible.

Data stored for review

ECNs are automatically saved, allowing users to easily review and track previous change requests. A user can easily navigate through any changes ever made as well as their respective dispositions.

Powered by QBuild

Since 2002, QBuild Software has provided superior service to customers across the globe—earning the reputation as the best CAD ERP Integrator headquartered in North America that serves customers globally. QBuild offers the highest quality of engineering design interface software on the market today—enabling the direct connection of CAD data to ERP, reducing engineering costs, streamlining internal ECN processes, and equipping sales teams with engineering expertise.

Flexible solution

Epicor ECN Manager can be customized to fit your company-specific needs. We work closely with our customers to develop customizations—ensuring that ECN integrates seamlessly into your current workflow.

Extension to Epicor CADLink

When used with the Epicor CADLink Extension, Epicor ECN Manager is compatible with industry-leading CAD systems like SOLIDWORKS®, Inventor®, AutoCAD®, Solid Edge®, NX™, and more.

About Encompass

Encompass Solutions is a business and software consulting firm that specializes in ERP systems, EDI, and Managed Services support for Manufacturers and Distributors. Serving small and medium-sized businesses since 2001, Encompass has helped modernize operations and automate processes for hundreds of customers across the globe. Whether undertaking full-scale implementation, integration, and renovation of existing systems, Encompass provides a specialized approach to every client's needs. By identifying customer requirements and addressing them with the right solutions, we ensure our clients are equipped to match the pace of Industry.
